

1. (Previously presented) A method of printing information by a network kiosk comprising the steps of:

(a) receiving a command to display a web page in response to user operation of the kiosk;

(b) receiving a command to print information in the displayed web page in response to user operation of the kiosk;

(c) obtaining an address of the displayed web page by the kiosk;

(d) determining a format for printing the information from the web page on receipt paper smaller than the web page using the address by the kiosk;

(e) creating a script to print the information in the format by the kiosk; and

(f) executing the script to cause a receipt printer of the kiosk to print the information on the receipt paper by the kiosk.

2. (Previously presented) The method as recited in claim 1, wherein step e comprises the substeps of:

(e-1) determining placeholders for the information; and

(e-2) arranging the placeholders in the script in accordance with the format.

3. (Previously presented) The method as recited in claim 2, wherein step e further comprises the substeps of:

(e-3) determining text to be printed with the information; and

(e-4) arranging the text in the script in accordance with the format.

4. (Previously presented) The method as recited in claim 2, wherein step e further comprises the substeps of:

(e-3) determining a graphic image to be printed with the information; and

(e-4) arranging the graphic image in the script in accordance with the format.

5. (Previously presented) A method of printing information by a network kiosk comprising the steps of:

(a) receiving a command to display a web page in response to user operation of the kiosk;

(b) receiving a command to print web information in the displayed web page in response to user operation of the kiosk;

(c) obtaining an address of the displayed web page by the kiosk;

(d) determining a format for printing the web information from the displayed web page on receipt paper

smaller than the displayed web page using the address by the kiosk;

(e) determining other information to be printed with the web information by the kiosk;

(f) determining placeholders for the web information by the kiosk;

(g) creating a script with the placeholders and the other information arranged in the format by the kiosk; and

(h) executing the script to cause a receipt printer of the kiosk to print the web information and the other information on the receipt paper by the kiosk.

6. (Currently amended) A method of printing information by a network kiosk comprising the steps of:

(a) receiving a command to display a web page in response to user operation of the kiosk;

(b) receiving a command to print web information in the displayed web page in response to user operation of the kiosk;

(c) obtaining an address of the displayed web page by the kiosk;

(d) determining a format for printing the web information from the displayed web page on receipt paper smaller than the displayed web page using the address by the kiosk;

(e) determining text information to be printed with the web information by the kiosk;

(f) determining a store graphic to be printed with the web information by the kiosk;

(g) determining placeholders pointing to a location of the web information by the kiosk;

(h) creating a script with the placeholders, the text information, and the store graphic, all arranged in the format by the kiosk;

(i) ~~(h)~~ initiating execution of the script by the kiosk;

(j) ~~(i)~~ printing the text information and the store graphic in the format during execution of the script by a receipt printer of the kiosk;

(k) ~~(j)~~ obtaining the web information from the location during execution of the script by the kiosk; and

(l) ~~(k)~~ printing the web information in the format during execution of the script by the receipt printer of the kiosk.

7. (Previously presented) A network kiosk comprising:
a display for displaying a web page;
a receipt printer; and
a computer which receives a command to display the web page in response to user operation of the kiosk, receives a

command to print information in the web page in response to user operation of the kiosk, obtains an address of the web page, determines a format for printing the information on receipt paper smaller than the web page using the address, creates a script to print the information in the format, and executes the script to cause the receipt printer to print the information on the receipt paper.

8. (Previously presented) A network kiosk comprising:
a display for displaying a web page;
a receipt printer; and
